Consolidated

PORTFOLIO OVERVIEW —

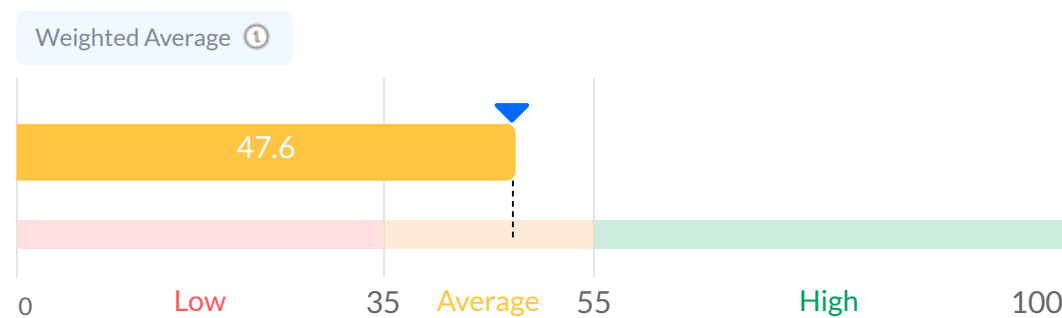

CONSOLIDATED PORTFOLIO SCORE —

A Consolidated portfolio score assumes significance as it quantifies the performance and risk associated with a collection of securities within a equity and a mutual fund portfolio. Trendlyne measures the overall performance and risk of the portfolio to compare it to benchmark indices or other portfolios.

Equity Segment Portfolio Score

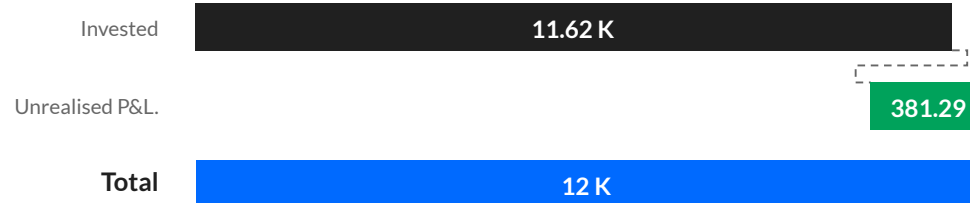

47.6 /100

PERFORMANCE —

Overview of your portfolio's performance based on your total investment, unrealised P&L, and the percentage of gain or loss.

Portfolio Performance - Consolidated

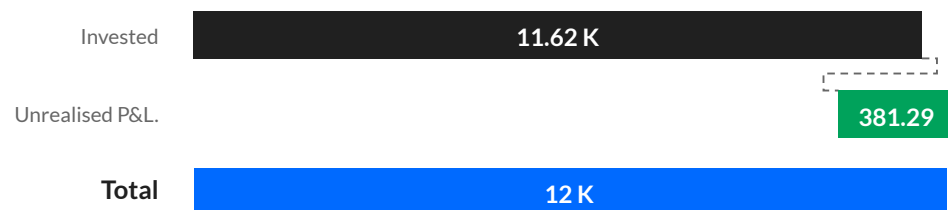

💡 Portfolio's unrealized gain: Rs 381.29, with a 3.3% ROI.

Portfolio Performance - Equity

Change in Invested Amount

SECTOR DISTRIBUTION —

Portfolio distribution check across various sectors. An ideal portfolio invests in stocks from different sectors to reduce market risk and volatility.

MARKET CAP DISTRIBUTION —

Portfolio distribution check across different market capitalizations (large, mid and small).

✔ Your portfolio is well diversified across market cap.

INVESTMENT STYLE —

Your investment style by analysing all the diversification and your preference

	Growth (21.8%)	Growth+Value (55.6%)	Value (0%)	Others (22.6%)	
Market Cap	8.7%	42.4%	0%	0%	Large Cap (51%)
	7.9%	7.7%	0%	5.3%	Mid Cap (21%)
	5.2%	5.5%	0%	3.4%	Small Cap (14.1%)
	0%	0%	0%	13.9%	Others (13.9%)
Type of Stock					

Your dominant investment type

Large Cap - Growth+Value

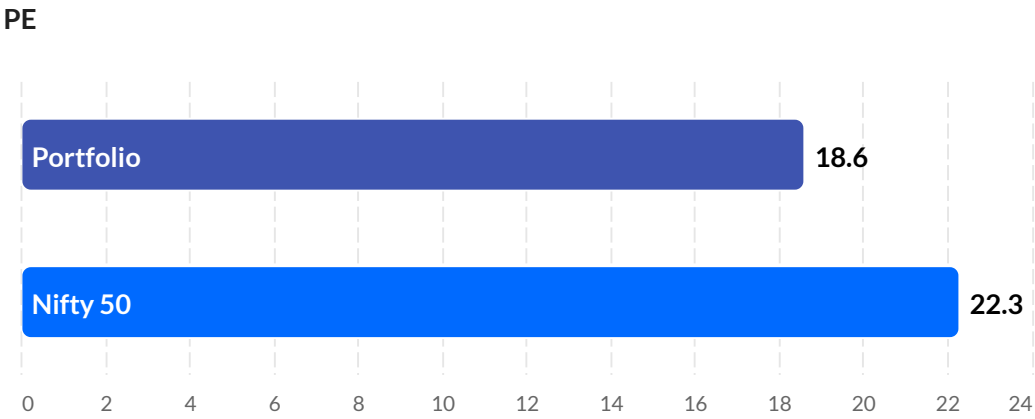

Specify your preference for growth, value, or a mix. Growth stocks show high revenue/profit growth, while value stocks have a P/E under 20 or a PEG between 0 and 1.

Benchmarking

VALUATION METRICS —

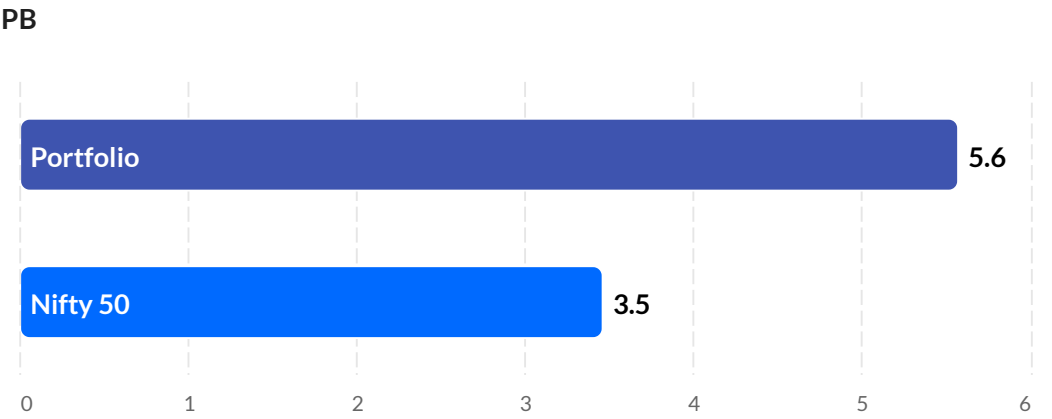

Price-to-earnings (P/E) and price to book (P/B) ratios to assess your portfolio’s valuation. Valuation metrics are compared against the benchmark Nifty 50 index.

Your portfolio stocks are relatively undervalued compared to the benchmark, suggesting an expected lower rate of earnings growth.

✔ Your Portfolio price to earnings is 18.61 vs Nifty 50 price to earnings of 22.28.

Your portfolio stocks are relatively overvalued compared to the benchmark.

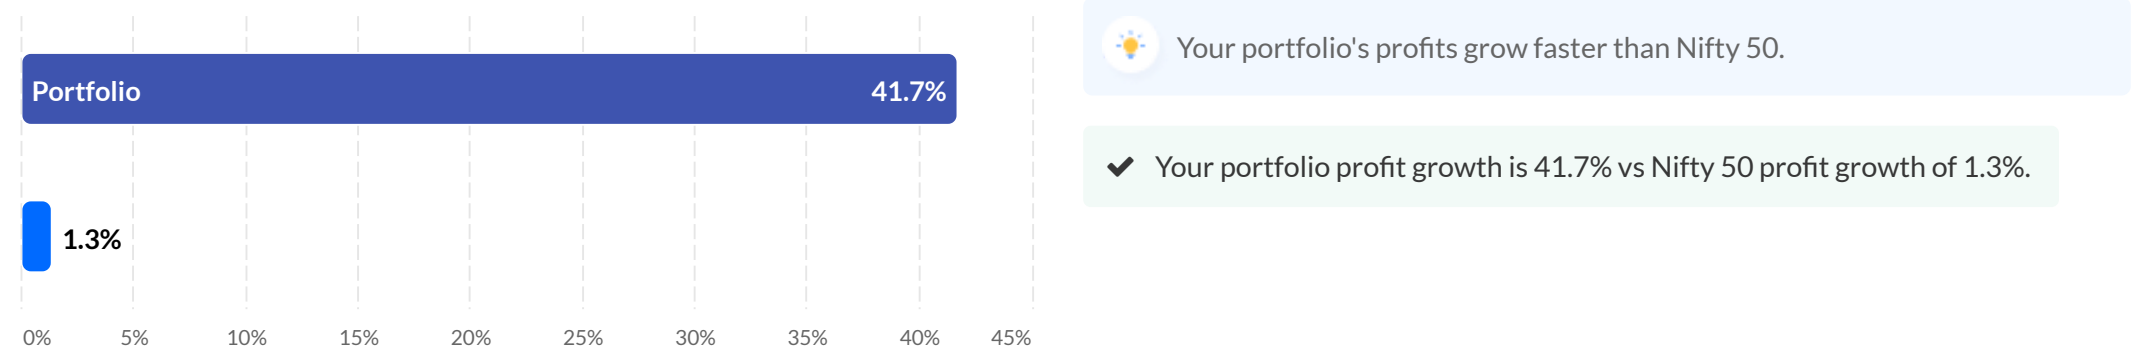

✘ Your Portfolio price to book is 5.57 vs Nifty 50 price to earnings of 3.46.

GROWTH METRICS —

Weighted average profit and revenue growth of your portfolio stocks compared to those of the Nifty 50. Check if your portfolio is outperforming or underperforming the benchmark in financial metrics.

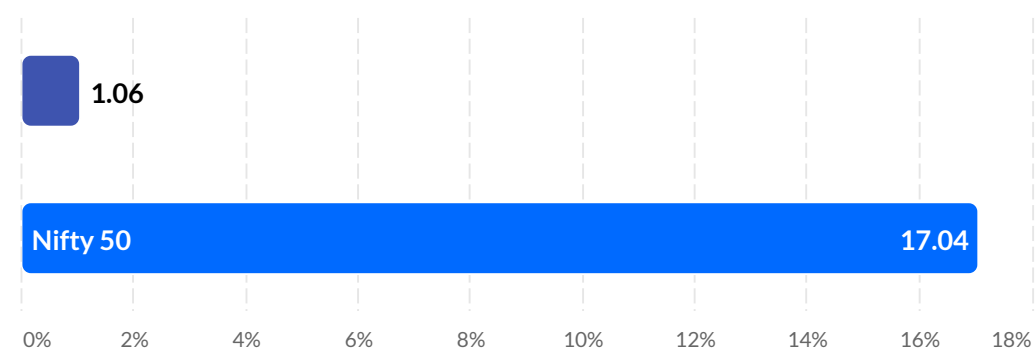

Profit Growth %

OTHER FINANCIAL RATIOS —

The price/earnings-to-growth (PEG) ratio is a stock's price-to-earnings (P/E) ratio divided by its expected earnings growth rate. PEG ratio below 1 is considered undervalued. Dividend yield is a stock's annual dividend payments to shareholders expressed as a percentage of its current price.

PEG

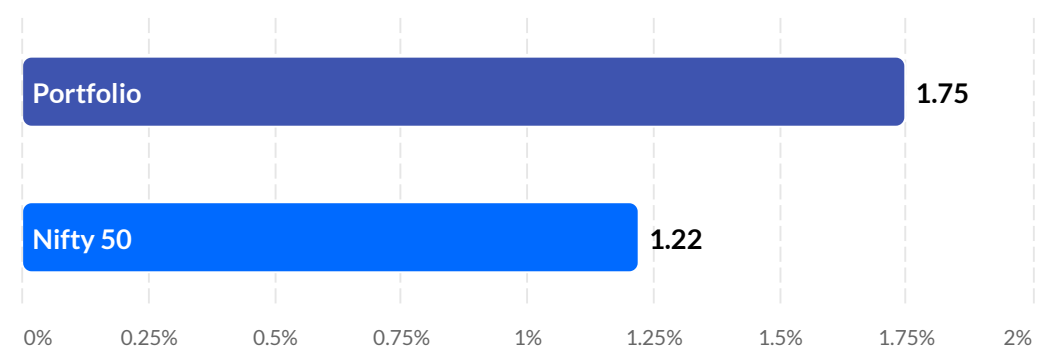

💡

Portfolio's PEG ratio is lower than Nifty 50, suggests undervaluation.

✓

Your portfolio PE to growth is 1.06 vs Nifty 50 PE to growth of 17.04.

Dividend Yield %

💡

Your portfolio's dividend yield is higher than Nifty 50.

✓

Your portfolio dividend yield is 1.8% vs Nifty 50 dividend yield of 1.2%.

Risk Analysis

LIQUIDITY CHECK —

The percentage of your portfolio categorised as illiquid. Shows challenges in selling these stocks due to low trading volumes on the exchanges, leading to losses.

% of illiquid stocks in your portfolio

0.2%

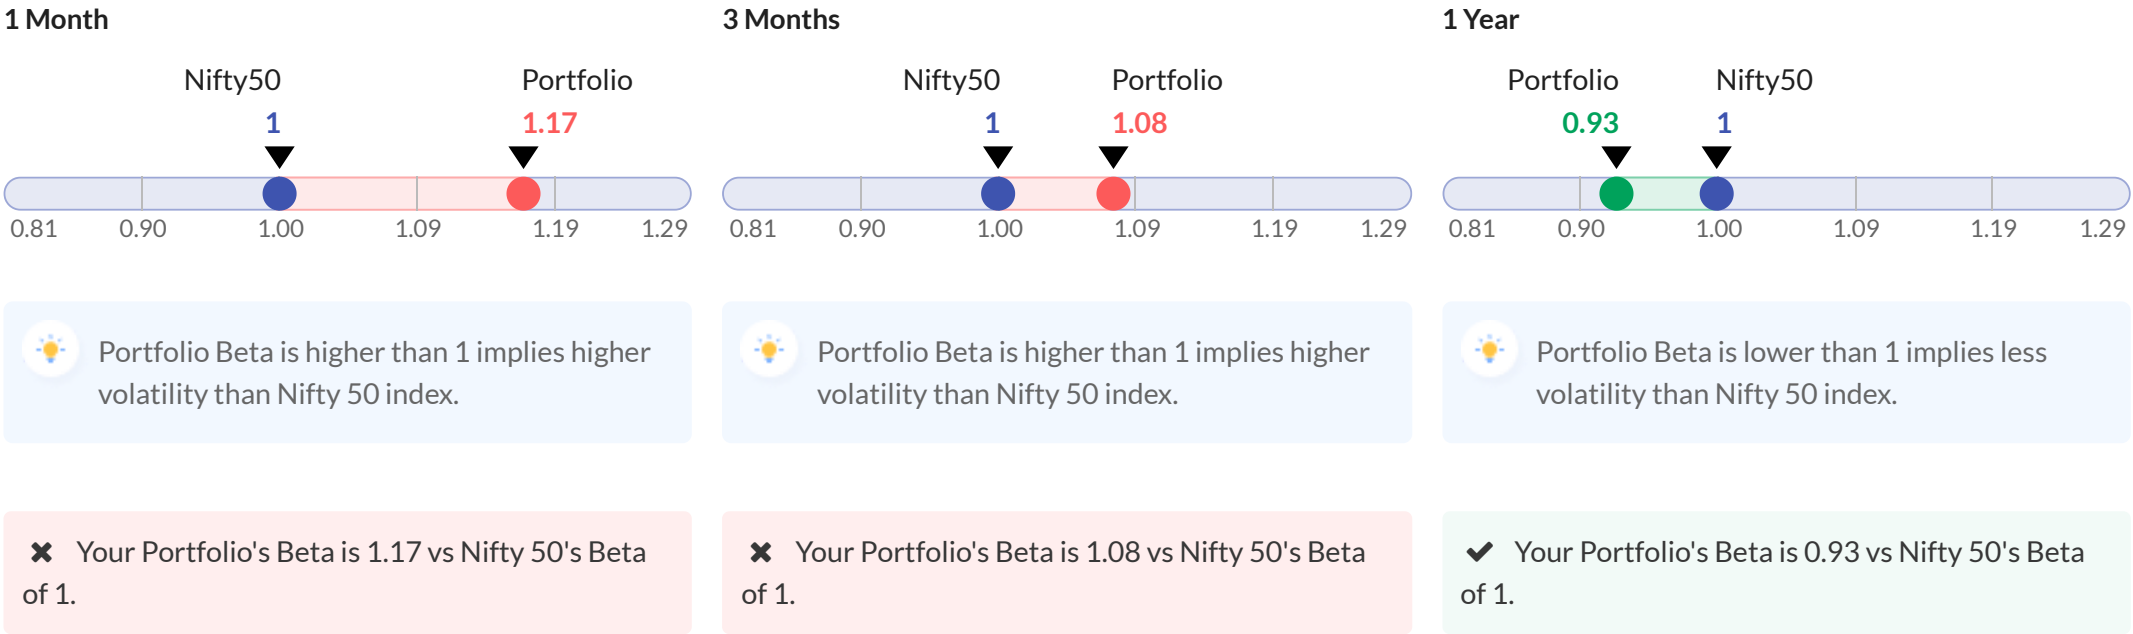

STOCK	SHARES OWNED	MARKET VALUE
Kwality Wall's (India) Ltd.	1	₹28.10

💡

This means that 0.2% of your portfolio is illiquid due to low trading volume on the exchanges. You may not be able to easily sell these stocks because of lack of demand.

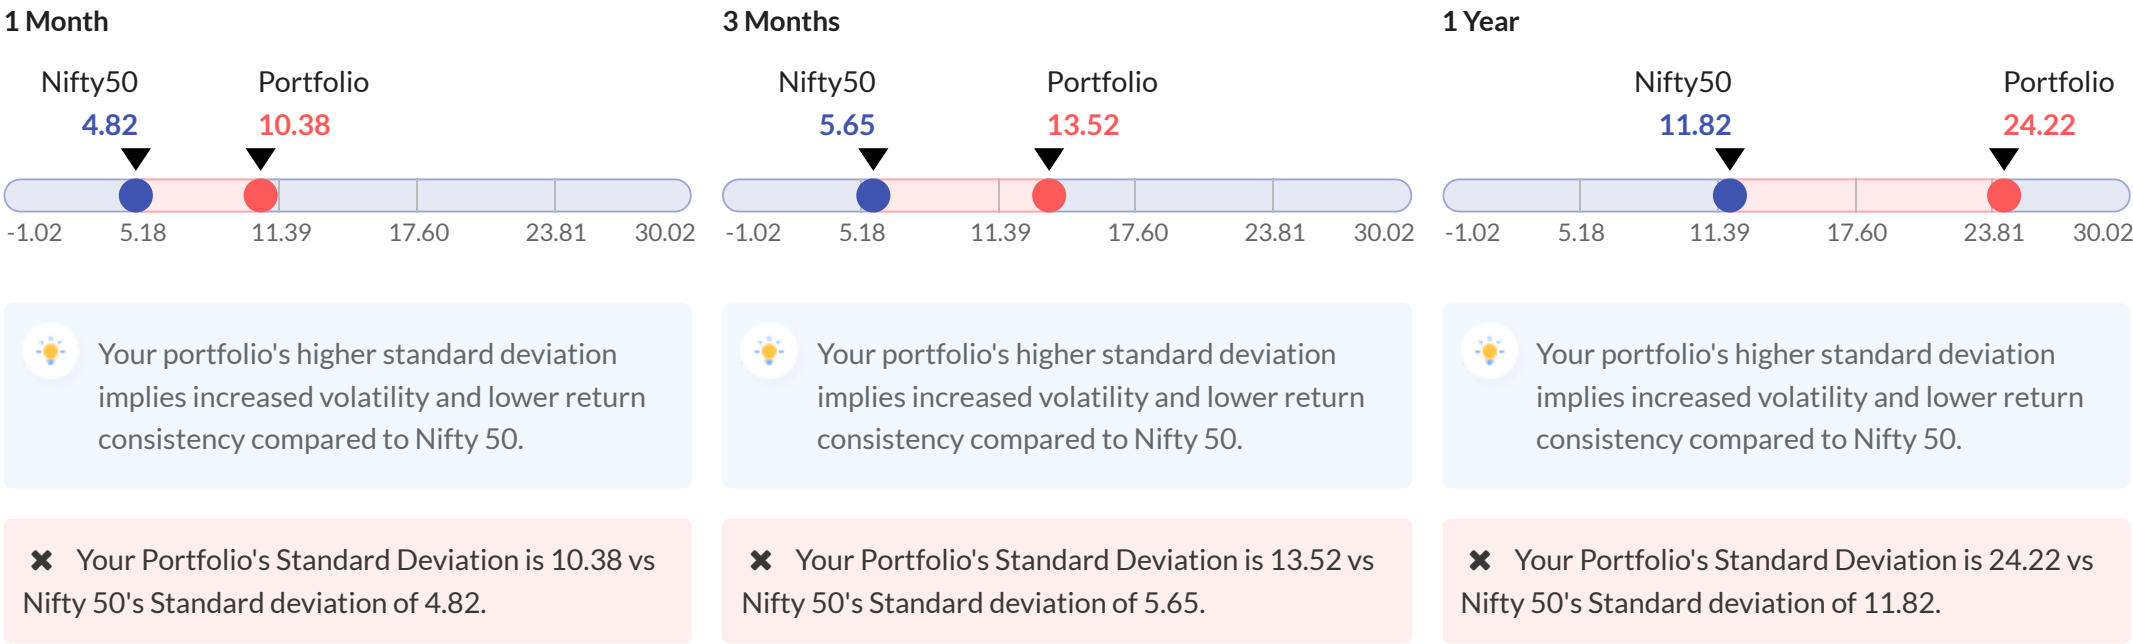

BETA —

Beta (β) measures volatility or systematic risk of your portfolio against the Nifty 50. A portfolio with beta higher than 1 is more volatile than the Nifty 50. A portfolio can have a lower beta and still have higher total risk due to firm-specific risks. Total risk consists of systematic and firm-specific risks.

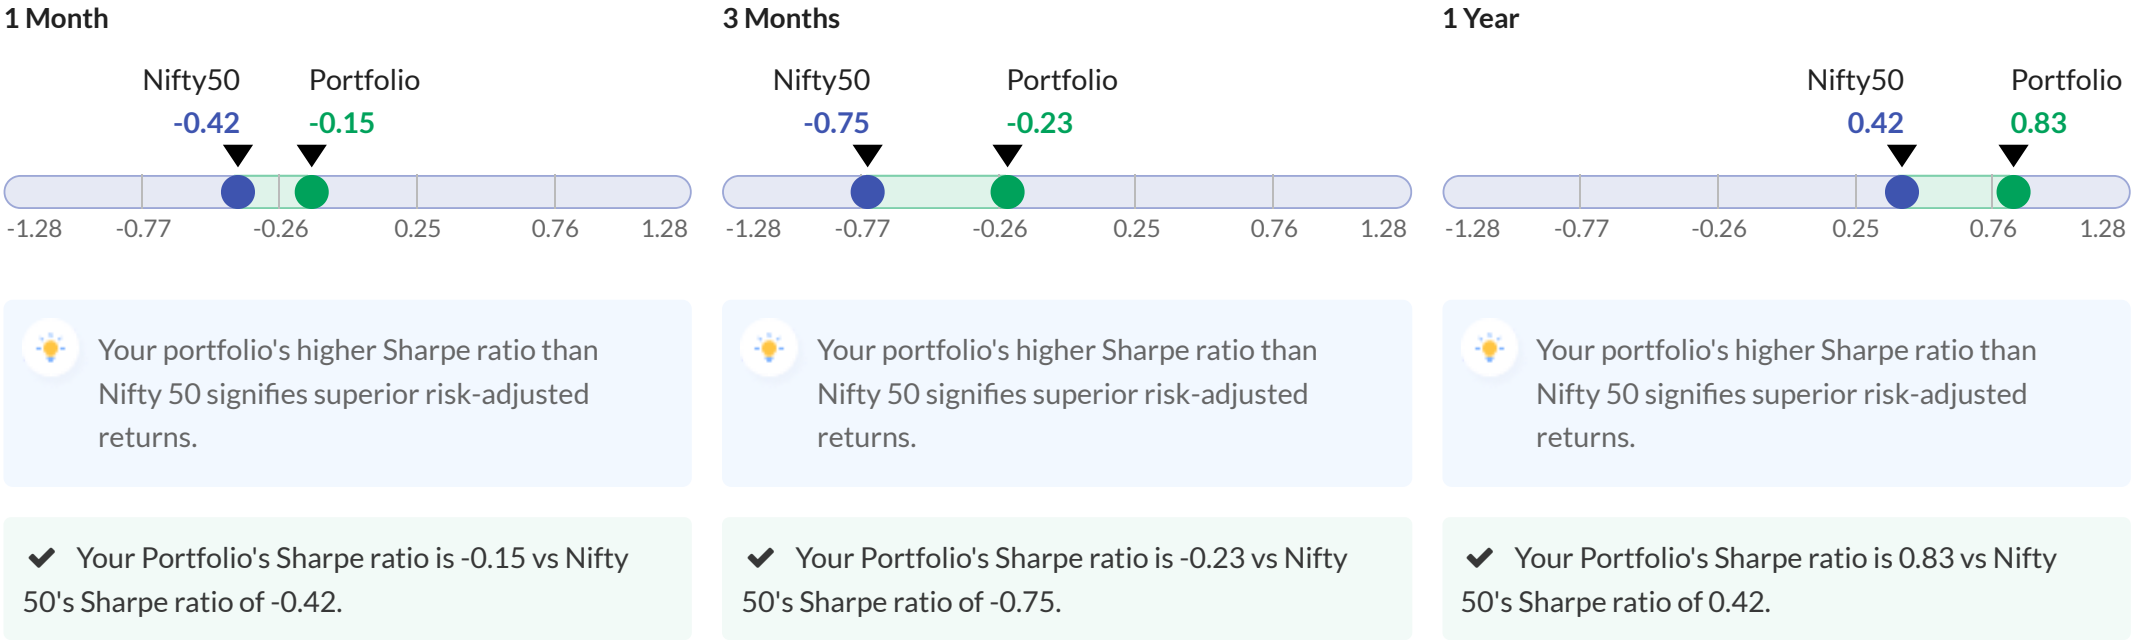

STANDARD DEVIATION —

Standard deviation of a portfolio measures how much investment returns differ from the average probability distribution. A bigger standard deviation means more risk, with volatile returns. A smaller standard deviation means less risk, with steady returns.

SHARPE RATIO —

The Sharpe ratio measures risk-adjusted returns. It checks if the excess return gained is in line with the extra risk you took. A bigger Sharpe ratio means your investment did well. If the ratio is higher than 1, it's good. If it's more than 2, it's very good. And if it's 3 or more, it's excellent.

VALUE AT RISK (VAR) —

Valuation metrics are financial measures used to determine the value or worth of a stock, company, or asset.
